Attention : Human Resources Manager

Subject : Employment

Dear Sir/Madam

Thank you for your interest and time.

I'm looking for a chance to gain experience that continues to improve while also offering value and helping the organisation I work for succeed.

I consider myself to be technically skilled, committed, hard working, good team player, trustworthy, and self-motivated. I take every chance to increase my technological expertise and knowledge.

I graduated in February 2007 and am currently enrolled in the new certificate program "Supply Chain Analytics" through EDX.org. In addition to a full-time job as a Senior Programmer Analyst in CBST-EGYPT, I am a Business Software Solutions Consultant as a freelancer.

As a CTO, I use computers and related systems to build new IT solutions, change, extend, or adapt current systems, and integrate new features or upgrades, all in an effort to increase business productivity and efficiency. I possess a high level of technical knowledge and am experienced in modern business procedures. Clients may be internal, such as departments within the same organisation, or external, depending on the employer.

I want to thank you again for your interest and time, which I am sure won't be wasted if you look over my resume.

Yours

Eng. Ahmed Nasr El-Din

Chief Technology Officer (CTO)

CERTIFIED
